Stanley and Karen Pigman College of Engineering *Lean Systems Program* LEAN SYSTEMS PROGRAM SERVICES

An Equal Opportunity University

WHO WE ARE

True Lean[™] Instructors and Coaches include former Toyota leadership, many of whom were among Toyota's first North American management. Toyota has dedicated an Executive-in-Residence to our program as we maintain a strong relationship with Toyota to teach the true essence of the Toyota Production System. Our Instructors and Coaches have supported numerous organizations through their successful transitions to True Lean[™]. We put the right team together to deliver, coach and support you toward the development of your System.

WHAT WE DO

We transfer our TPS & Toyota Way knowledge and experience to you.

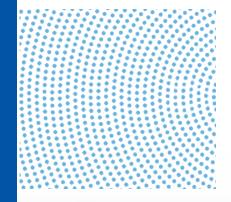

Our value is the richness of not only our Toyota experience, but also our experience supporting other organizations in their transition to True Lean[™]. Many fail on their lean journey because they are not following the True teachings of Toyota. Other teachings instruct on what they have read (or tried) about Toyota tools. But they miss the True Essence of Toyota teachings, and they do not include the cultural elements.

"Many good American companies have respect for individuals and practice kaizen and other TPS tools. But what is important is having all elements together as a system."

-Fujio Cho Former Chairman of Toyota Motor Corporation

"The key to the Toyota Way and what makes Toyota stand out is not any of the individual elements, but what is important is having all the elements together as a system. It must be practiced every day in a very consistent manner, not in spurts."

> -Taiichi Ohno Former EVP Toyota Motor Corporation
